**Subject:** Microsoft Settlement

Dear Sir,

Now that the Justice Department has spent untold millions of taxpayer dollars harrasing Microsoft and has finally reached a settlement it is time to move on. It appears to me that the Justice Department would have better things to do with its time and money, like fighting terrorists who want to destroy America, than attempting to destroy an innovative company like Microsoft that has contributed mightily to the American economic engine over the past decade.

Sincerely,  
Nolan Sieg
